Eco-Friendly Doors

by Liberty Valley Doors

- Source: BUILDER Magazine
- Publication date: 2007-11-07

Citing a need for eco-friendly doors, the manufacturer has introduced a line of doors made from salvaged materials. Each door is made from reclaimed glulam, stile-and-rail cores that are overlaid with recycled Douglas fir. Doors are available in one-, two-, or three-panel designs and come in standard and custom sizes. 707-795-8040. www.libertyvalleydoors.com.
